DevOps Engineer with a frontend engineering background and hands-on experience in CI/CD, Docker, Kubernetes, AWS, Terraform, Linux, and Bash. Experienced in building deployment pipelines, containerizing applications, managing cloud infrastructure and supporting remote engineering teams.

SKILLS

- AWS (Certified Cloud Practitioner), Docker, Kubernetes, Bash, Linux
- Terraform, Jenkins, GitHub Actions, GitLab CI/CD

EXPERIENCE

DevOps & Cloud Intern - EPAM Lab

January 2026 - May 2026

- Built and maintained CI/CD workflows using Jenkins, GitLab CI/CD, GitHub Actions for automated build, test, security scan and deployment processes
- Deployed and managed containerized applications on Kubernetes, configuring namespaces, secrets, PVCs, and environment-based configurations, with infrastructure provisioned via Terraform and configuration managed using Ansible on Linux-based systems
- Provisioned and managed AWS infrastructure using EC2, S3, IAM, VPC, CloudWatch, ECR, Lambda, API Gateway, DynamoDB, CloudFront, and Route 53, applying security best practices and basic monitoring

Frontend Engineer (Growth Engineering) - Remote (remote.com)

November 2020 - April 2025

- Built and maintained core parts of the marketing website and blog, improving content structure and user engagement
- Collaborated in remote engineering workflows using Git, pull requests, code reviews, CI processes, and production-focused frontend delivery
- Built an internal Node.js API leveraging Puppeteer to automatically generate PDFs from dynamic tools, streamlining report creation for multiple teams

EDUCATION

EPAM Campus *Cloud & DevOps*

August 2025 - November 2025

Kyrgyz-Russian Slavic University *B.A. in International Relations*

September 2012 - June 2016
