

# Kairat Kaipov

## DevOps engineer

kaipovich24@gmail.com

<https://github.com/kaipov24>

<https://kaipovkairat.com>

DevOps Engineer with a frontend engineering background and hands-on experience in CI/CD, Docker, Kubernetes, AWS, Terraform, Linux, and Bash. Experienced in building deployment pipelines, containerizing applications, managing cloud infrastructure, and supporting remote engineering teams.

## SKILLS

- [AWS](#), Terraform, Docker, Kubernetes, Jenkins
- Bash, CI/CD, GitHub Actions, GitLab CI/CD

## EXPERIENCE

### DevOps & Cloud Intern - EPAM Lab

January 2026 - Present

- Built and maintained CI/CD workflows using Jenkins, GitLab CI/CD, and GitHub Actions for automated build, test, security scan, and deployment processes.
- Deployed and managed applications in Kubernetes, configuring namespaces, secrets, PVCs, and environment-based configurations
- Provisioned and managed AWS infrastructure using EC2, S3, IAM, VPC, CloudWatch, ECR, Lambda, API Gateway, DynamoDB, CloudFront, and Route 53, applying security best practices and basic monitoring.

### Frontend Engineer (Growth Engineering) - Remote (remote.com)

November 2020 - April 2025

- Built and maintained core parts of the marketing website and blog, improving content structure and user engagement
- Collaborated in remote engineering workflows using Git, pull requests, code reviews, CI processes, and production-focused frontend delivery.
- Built an internal Node.js API leveraging Puppeteer to automatically generate PDFs from dynamic tools, streamlining report creation for multiple teams

## EDUCATION

### EPAM Campus *Cloud & DevOps*

August 2025 - November 2025

### Kyrgyz-Russian Slavic University *B.A. in International Relations*

September 2012 - June 2016
